

Business policy

Lidan Marine shall for the global market develop, manufacture, market, and sell complete, customized winch and handling systems, as well as offer related aftermarket services. Lidan´s customers are active preferably within the markets Marine (civilian and military), Subsea and Industry.

Lidan strive toward long-term customer relationships, a safe working environment and sustainable development by:

- offering products and services that meet our customers' requirements, needs and expectations as well as providing our experience and expertise.
- ensuring that quality, health and safety, and environment management system meet the ISO-standard requirements and that the products meet the requirements of the relevant certification institutions.
- securing all employees' skills and commitment, as well as work to constantly improve the business.
- enforcing improvement work in processes and employees' individual development.
- ensuring that there are procedures to prevent accidents, creating good occupational health and to reduce environmental impact.
- creating pre-conditions to communicate the objectives and making resources accessible to fulfill them. Objectives are reviewed from time to time in regards to continued suitability.
- ensuring that activities are carried out in accordance with established procedures and that the result is evaluated with respect to set objectives.
- ensuring that Lidan always meets legal requirements, product safety requirements and other requirements to which we are committed.
